

About Viber

Viber is developed by Viber Media, Inc. a pioneering global mobile messaging and VoIP company with offices in Belarus, Brazil, Cyprus, India, Israel, Japan, the Philippines, Russia, Vietnam and the UK. Viber lets everyone in the world connect. Freely. Viber users can send free* text messages, fun stickers, photos, videos and doodles, share locations anywhere in the world, make free HD-quality calls, communicate with Push-To-Talk on iPhone®, Android™ phones and tablets, Windows Phone, Blackberry®, Windows®, Windows 8®, Mac, Linux, Symbian, Nokia S40 and Bada devices over 3G/4G or WiFi connections. Now, Viber Out enables users to make low-cost calls to any phone number around the world. With more than 370 million users in 193 countries, Viber is constantly innovating by introducing new platforms and adding fun new features.

Viber is simple to use - it integrates seamlessly with your existing address book and uses your cell phone number as your Viber ID. All you need is a 3G** or WiFi connection and friends who also use Viber.

Why Viber?

100% FREE: Viber and its features are completely free*, with no subscriptions or additional purchases needed. Text and call other Viber users as much as you like, no matter where they are or what device or network they use. All you need is a 3G** or Wi-Fi Internet connection. Just make sure all your friends are on Viber too!

SIMPLE TO USE: Viber just works. There is no need to create another username, password, or registration. After a quick download, you can make free calls and send texts, photos and locations with one touch.

ALWAYS ON: Viber doesn't drain your battery or use your memory, so you can always receive your incoming calls and message notifications.

ACTS JUST LIKE YOUR PHONE: Viber uses your own mobile phone number and address book, instantly showing you which of your friends are already on Viber. Other apps add work by making you "add contacts," wait to be approved, and maintain separate contact lists. With Viber, text, call and share with your friends using their own numbers, not usernames.

BEST SOUND QUALITY: Viber's cutting edge technology ensures that the sound quality you get is much better than GSM or a regular phone call.

AD FREE: Viber has no ads and promises that mobile text and calls will always be ad free.

MUCH MORE COMING: We are hard at work bringing you many more features and support for more platforms. Stay tuned!
